Your chance to become an independent entrepreneur

For our carpentry and sawmill in Las Lajas, Panama we are looking for an entrepreneurially thinking manager (f/m/d) at the earliest opportunity

The ForestFinance Group has been active for 25 years in ecological reforestation and the protection of mixed forests in the tropics and has reforested more than 8,000 hectares of tropical forest. The forests and agroforestry systems are created through investments by more than 20,000 customers and are managed sustainably for their benefit. This includes harvesting, further processing and the sale of natural raw materials such as wood and cocoa. We therefore operate a sawmill on the west coast of Panama where wood from our own forests is processed directly.

You will find more information about us on our website at

www.forestfinance.com

This is what you can expect:

We operate a carpentry and sawmill in Panama with currently twelve employees. The facility and machinery, including a wood drying plant, are four years old. Now it is time to spin off this wood processing facility, which used to be a department of our forestry unit, as an independent company. For this purpose we are looking for an independent manager (m/f/d) who would like to participate entrepreneurially and who would like to build something of his own.

Your profile

- ✓ You are a carpenter, joiner, wood technician or have a comparable qualification.
- ✓ You speak Spanish very well and are ready to move your focus of life to Panama.
- ✓ You have initial experience in leading a team.
- ✓ You want to expand and further develop a company yourself with full commitment and risk and turn it into 'your thing'.
- ✓ In addition to technical skills, you also have the necessary economic knowledge to successfully run a business.

Have we sparked your interest?

Then send us your detailed applications (also from couples) to bewerbung@forestfinance.de
